

What Makes Us Different? WORX® Biodegradable Hand Cleaner

Do your customers suffer from dry, cracked, skin on their hands?

Rashes are often caused by an allergic reaction, but what if the immune system wasn't involved?

When it comes to our hands the culprit is often caused by a chemical reaction to hand cleaners. Most common hand cleaners contain harsh chemicals, shells and abrasives that remove the surface oils that are shielding our skin. The longer we use these chemicals, the worse the reaction. It's called irritant contact dermatitis.

Available In Several Convenient Sizes

WORX® Biodegradable Hand Cleaner remains a safer alternative to the damage caused by hand cleaners containing harsh chemical. WORX® relieves symptoms caused by contact dermatitis and dry skin!

Not only does WORX® Biodegradable Hand Cleaner outperform the competition, it restores your skin's natural pH balanced and helps soothe dry cracked skin. WORX® Biodegradable Hand Cleaner it is also Green Seal® Certified, a symbol for environmental excellence!

WORX® is truly the 'Safest Alternative' for your hand cleaning needs, readily biodegradable, does not contain microbeads, walnut shells or harsh abrasives!
