

ATTENTION DRUG DISPOSAL STAFF

Rx Destroyer™ Guidelines:

1. Document waste in your Pyxis, Omnicell, controlled drug inventory sheet, or other automated medication dispensing cabinet.
2. Load medications into the bottle CII-CV-Funnel use is optional.
 - Load pills, suppositories, powders, creams, IV BAG waste.
 - Fold patches before inserting into bottle.
 - Squirt syringe dose into bottle. -- DO NOT place syringe or vial into the bottle, use sharps container.
3. Tightly secure cap and gently agitate for 10 seconds. (recommended at least 1-2 times/day or per usage)
4. After each drug disposal session, repeat step #2.
5. Bottle is full when contents rise within 2" from top of bottle.
6. NOTIFY your internal designated department to remove the bottle to be placed in the proper disposal bin, according to internal discard process.
7. NOTIFY your internal designated department to replace the new Rx Destroyer™ bottle securely into the Rx Destroyer™ locking accessory.
