

PLASTIC GUARD RAIL SYSTEM BY GLOBAL INDUSTRIAL™

COLLECTION INCLUDES RAILS IN MULTIPLE LENGTHS & POSTS FOR EVERY CONFIGURATION

The Global Industrial™ Plastic Guard Rail System is your solution to protecting personnel and sensitive equipment from impact damage. Made from durable proprietary plastic resin, this self-healing guard rail system is designed to recover quickly after vehicle impact and is able to deflect up to 9,000 lbs. at 7 mph when paired with coordinating posts. It has a highly visible, bright yellow finish and can be securely bolted to a range of posts from 18" to 60" tall. Configurable as a single unit, straight runs, or around corners, this system is easy to install and is an ideal addition to any warehouse or facility. Patent Pending.

MADE TO EXCEED®

- ✓ UV- & freeze-resistant (-94°-158°)
- ✓ Highly flexible & resistant to chips, flaking, & corrosion
- ✓ ANSI I 9-7 compliant with a 20,000-joule impact rating

KEY FEATURES:

SELF-HEALING DESIGN

Built for lasting durability, this system features a self-healing design that recovers quickly after vehicle impact and reduces the need for costly replacements

POSTS FOR EVERY CONFIGURATION

Rails can be paired with end posts, middle posts, or corner posts to create a customized guard rail system that better fits the needs of your facility

REDUCES RISK OF DAMAGE

Coordinating posts are equipped with a stable rubber base that anchors securely to concrete and provides added energy absorption to reduce floor damage

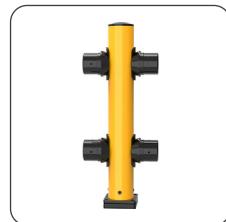

Highly visible for added safety

Corner posts for creating 90° angles

End post starts or finishes off your guard rail system

Middle posts easily extend the length of guard rail system
