

*Right-hand guard shown*

The Column Core<sup>®</sup> reinforcement is shown in yellow for added emphasis and detail. Actual item is welded into the rack column before painting.

Designed to protect both 3" and 4" wide columns/uprights, Steel King's Free-Standing Column Protectors come in three standard heights.

## Guard Dawg<sup>®</sup>

Steel King's Guard Dawg system is an inexpensive low profile method to protect racks at intersections and along high traffic routes. Steel King's Guard Dawg can be ordered in any custom size needed.

- 5" x 3" x 3/8" angle
- 46" right or left guards in stock
- Double-ended guards available
- Protects 3" or 4" wide, 42" deep uprights with standard footplates
- Anchors and hardware included

## Column Core<sup>®</sup>

Forklift damage is the leading factor in about 90% of rack failures. Column Core strengthens SK2000<sup>®</sup> rack uprights and is exclusively available as a component to Steel King's SK2000 tubular racks, the benchmark system in the rack market. Column Core's unique C-shaped column reinforcement improves on SK2000 rack that's already two-and-a-half times more impact-resistant than comparable open-back racks. With Column Core, your SK2000 rack is five times more impact resistant at the front corners and side – where the upright is most vulnerable.

- Retain full beam adjustability
- Reduce puncturing, buckling and torsional twisting
- Reinforce only as high as needed

## Free-Standing Column Protectors

Steel King's Free-Standing Column Protectors shield rack columns from collision damage by blocking and deflecting fork trucks at the point of impact.

- Easy after-market add-on
- Standard heights: 12", 18", 24"
- Highly visible, safety yellow
- Protects 3" or 4" wide columns with standard base plates
- Requires four 1/2" X 3-3/4" anchors

## Snap-Guard<sup>®</sup> Column Protectors

Steel King's Snap-Guard is an adjustable column protector for boltless rack that protects SK2000 upright rack column from forklift damage. Snap-Guard is constructed of structural angle and features an exclusive four-rievet connection that automatically locks into the upright column. Adjustable, removable and flexible, the Snap-Guard can be used to protect each storage level. A great after-market addition to any pallet rack installation, Snap-Guard is available immediately through Steel King's Quick Ship program.

- Easy after-market add-on
- Four-rievet snap-on connection
- Auto-engaging safety lock
- Adjustable in 2" increments
- Remove and adjust tool available

# Why Choose Steel King?

**Industry Leadership** – With our state-of-the-art facilities and active participation in the associations that develop the national specifications for quality and safety, we lead the way with our uncompromising dedication to engineering and manufacturing excellence.

**Expertise and Versatility** – Our in-house engineering and drafting staff has decades of experience designing thousands of storage systems, which means we can custom engineer a solution for any storage challenge and ensure efficient space utilization.

**Quality and Safety** – Steel King is committed to providing customers with the highest quality and safest products possible. Our structural engineers design our products to strictly conform to industry design codes, and our rack system capacity charts are RMI-certified to ensure product and worker safety. Steel King facilities and processes are tested and fabricator licenses are approved for the City of Los Angeles and the City of Phoenix.

**Durability** – Made with the highest quality materials available, Steel King products are built to last. We design them to better resist the daily rigors of your environment, which means they last longer, require less maintenance and provide greater safety.

**Single Source Responsibility** – Our wide breadth of product offerings allows us single-source responsibility that ensures both cost and quality control.

**Welder Certification** – Our welders are trained and qualified to American Welding Society (AWS) D1.1 and D1.3 standards. We also have an in-house Certified Welding Inspector (CWI).

**We are a “one-stop shop”  
for all your storage needs.**

**Steel King has been  
delivering customized  
storage solutions  
since 1970,**

designing and manufacturing pallet racking systems and related material handling products that improve operational efficiency in manufacturing, warehousing and distribution facilities.

When it comes to offering the highest quality, safest and most diverse product offerings,

**Steel King is built to deliver®**
