

Safety Surfacing Solutions

Poured In Place Surfacing

Utilizing recycled products, SurfaceSure's Poured Rubber Surfacing offers a range of superior surfaces designed to fit any budget. These two-layered unitary products are impact absorbing, providing resilient non-skid surfaces that are an excellent choice for accessibility. The surface layer may be specified as one or a combination of colors, encouraging graphic designs that can range from custom logos to simple games like tic-tac-toe and hopscotch. These graphics can be utilized to enhance ground level play on every playground, thus increasing play value.

Be sure to use an **IPEMA-certified** surfacing specialist.

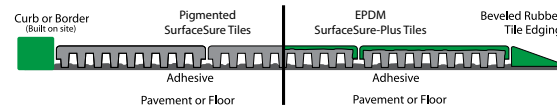

Create custom colors and save money by blending varying amounts of black and color!

Interlocking & Standard Tiles

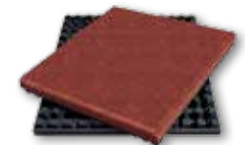

We offer Interlocking Tiles and Standard Tiles (individually glued to sub-base) to meet your site-specific needs. SurfaceSure Tiles are available in various thicknesses to provide the appropriate amount of impact attenuation for the fall height of your structure or play event. Tile surfacing allows for easy replacement of small areas of surfacing in the event of vandalism or other damage. Premium multicolored tiles, highly durable EPDM-topped tiles, custom edging options, and ADA accessible ramp tiles are also available.

Be sure to use an **IPEMA-certified** surfacing specialist.

Standard

Engineered Wood Fiber

SurfaceSure Engineered Wood Fiber is specifically designed and engineered per the ASTM standard for impact attenuation on playground surfaces. Wear Mats, Geotextile Fabric, Border Timbers, along with periodic maintenance (including adding fiber) are needed to maintain the required depth. When compacted, SurfaceSure Engineered Wood Fiber meets the ASTM standard specification for determination of accessibility of surface systems for playgrounds.

Made from recycled materials

Border Timbers

Made from 100% recycled materials, our border timbers are designed to retain engineered wood fiber surfacing. These timbers are easy to install and are secured with ground spikes.
