HAWSCLEAN™ Portable Eyewash Cleansing Stick

FEATURES & BENEFITS

PREVENTION

Copper-Silver Ionization provides three years of protection against the growth of algae, fungi, Legionella, E-Coli, and other pathogenic bacteria. Prevents the buildup of scale, biofilms, and corrosion.

PERFORMANCE

Specifically designed for use in portable emergency eyewash products: One stick cleanses up to 60 liters; two sticks will treat up to 120 liters

OTHER FEATURES

Other features include no power required, easy to use and simple to install, and environmentally friendly using no chemicals to treat the water

OPTIONS

For more information, visit www.hawesco.com or call (888) 640-4297.

SPECIFICATIONS

The model 9083 HawsCLEAN™ cleansing stick is the safe and effective way to prevent the growth of Legionella, E-Coli and other harmful bacteria in most gravity fed or pressurized portable emergency eyewash equipment. Simple to install and maintain, the HawsCLEAN cleansing stick is non-chemical, non-powered, environmentally friendly and cost effective. Provides clean water and ANSI compliance in equipment up to 15 gallons (60 L) for up to three years when serviced just once annually. Simply immerse the stick in the tank and the process of protection starts immediately.

APPLICATIONS

For use with most gravity fed and pressurized portable eyewash equipment that uses potable water.
