

KEEP IT COOL ON THE GO

With internal pockets that place ice directly against the surface of your container, North Slope Chillers' Icepack Blanket and Keg Cooler are affordable options for temperature control. This blanket is insulated, ensuring ice packs will last longer than ice alone and longer than other non-insulated options on the market. Freeze your ice packs, wrap your product, and get on the road.

	PBICE015IP	Ice Wrap-15 Gallon Drum	12 Ice Packs
	PBICE030IP	Ice Wrap-30 Gallon Drum	18 Ice Packs
	PBICE055IP	Ice Wrap-55 Gallon Drum	24 Ice Packs
Keg Cooler	PBICEKEGIP	Ice Wrap-Keg	12 Ice Packs

KEG COOLER WORKS!

In a controlled experiment to test the effectiveness of the icepack blanket, North Slope Chillers started with a 40°F/4°C keg of beer, wrapped the blanket around the keg, placed it inside a 95°F/35°C environmental chamber and recorded the beer's temperature for twenty-four hours.

After six hours, the beer was 43°F/6°C and had only increased three degrees, and after twelve hours the temperature had only increased ten degrees to 50°F/10°C
