Your Guide to Wet Floor Care

Trying to find the ideal mop may feel like you're going through the wringer. We understand. That's why we're showcasing the very best from our expansive mop line to help you make an informed decision on the perfect mop to solve your floor care needs. And soon, you'll be wringing away any mess.

THE MAKINGS OF A MOP

Yarn
Your cleaning tasks will determine the appropriate yarn type

Headband
Available in a variety of sizes and textiles, this style drives the handle pairing

End
Available in looped-end or cut-end variations

Tailband
Prevents yarn from tangling and provides more prominent floor coverage

Factors to Consider for Choosing the Right Mop

1

Yarn Type
Determines the mops' absorbency, durability, release and launderability.

2

Headband Type
Dictates the mop handle selection, can be made of cloth or mesh.

3

Tailband Type
Ranges from small to x-large sizes and prevents tangling and improves floor coverage.

4

End Type
Available in looped-end or cut-end and impacts launderability, fraying, linting and unraveling.

MOP CONSTRUCTION

1. Yarn Type

Cotton

Good absorption and retention with limited shrinkage. Designed for general use - scrubbing and cleaning up liquids.

Synthetic Blend

Excellent choice for performance, price and durability, synthetic yarn is long-lasting and machine washable.

Microfiber Fabric

Superior absorbency, launderability, durability and withstands harsh commercial chemicals.

Grease Release

Absorbs grease and releases into bucket, ensuring a clean mop for each pass.

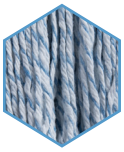

Rough-Floor

Heavy-duty, super absorbent and perfect for abrasive surfaces.

Rayon

Less linting, quicker absorption, easy release, fast drying and mildew resistant. Great for applying disinfectant or floor finishes.

Finish

Designed to release liquid faster than conventional mops for a smoother finish. Also highly durable, launderable and absorbent.

Microfiber

Provides a deeper clean, reducing the need for excess chemicals an ideal general-purpose mop.

Anti-microbial

Anti-microbial additive reduces bacteria growth, odors, stains and prevents the spread of germs and growth of mold.

	ADVANTAGES	DISADVANTAGES	USE
Cotton	Good absorption and retention with limited shrinkage and a low initial cost.	Break-in period is required. Slow drying yarn leads to mildew, deterioration and lint	Designed for general use - scrubbing and cleaning up liquids.
Synthetic	Long stable fiber offers excellent tensile strength without linting.	Higher cost. Poor absorption.	Rough surfaces.
Cotton Synthetic Blend	Excellent choice for performance, price, durability and color options.	Possible shrinkage.	For professionals who require a better, longer-lasting mop.
Rayon	Absorbs quickly with easy release. Dries fast and is mildew resistant. Cleaner yarn with less linting.	Shrinks when laundered and has less liquid retention.	Use for applying liquids such as disinfectant or floor finishes.

MOP CONSTRUCTION

2. Headband Type

Narrow Band

The textured polyester band attaches to quick-release handles.

Wide Band

This vinyl-coated mesh band fits jaw-style handles. Changing the mop head is quick and convenient.

ACME Thread Connection

Attach to ACME threaded handle for universal compatibility with other cleaning tools.

Screw Top

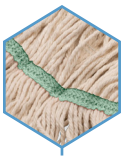

Its metal screw-on attachment easily twists onto screw-in mops.

Solution Insight:

Mesh headbands are fast drying and, alternatively, can be used as a scrubber due to the abrasive material.

3. Tailband Type

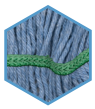

Woven Tailband

Provides more expansive floor coverage, launderability and a prolonged mop life.

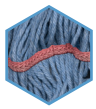

Sizes are indicated by tailband color:

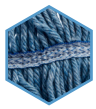

Small

Medium

Large

X-Large

No Tailband

Economical, great for smooth floors recommend hand-wash only.

4. End Type

Looped-End

Prevents fraying and unraveling, reducing labor and replacement costs the life expectancy makes looped-end mops a long-term economical choice.

Cut-End

Starts at a lower initial purchase price compared to looped-end. However, it cannot be laundered and covers less surface area per pass.

MOP FEATURES

Color-Coded
Easily assign specific colors to certain areas in your facility to reduce cross-contamination and increase sanitation.

Size
Mop sizes range from Small to X-Large. The proper size depends on the square feet of your mopping area.

Absorbency
Collects and retains liquid at higher levels enabling faster floor drying times to increase productivity and safety. Rayon and cotton yarns have the highest absorbency.

Durability
Mop durability measures how long it will last or perform before needing replacement. Synthetic and blended mops are the most durable.

Launderability
The number of washing cycles the mop can endure before it degrades or capabilities plummets. Synthetic and blended fiber mops have the highest levels of launderability.

Release
How well a mop disperses liquid onto the floor or during wringing. Higher levels promote quicker and more thorough wringing and more effective cleaning applications.

The majority of our mops are made with recycled materials.

How We Rate Our Mops

Based on absorbency, durability, release and launderability, we give each of our mops a rating out of 5.

Example Mop

Absorption	Durability	Release	Launderability

CUT-END MOPS

Economical & Practical

Cut-end mops provide high absorbency at an economical price for easy spot cleaning on smooth floors. However, expect a fraying and linty mop over time with its absent tailband.

Cotton Cut-End *4-Ply*

Absorption	Durability	Release	Launderability
●●	●	●●	*Not Recommended*

- Available in 1" or 5" headbands
- Easy to change mop heads lie flat for more efficient mopping
- Compatible with Quik-Release™ and Quick Change Handles (sold separately)

Cotton Cut-End *8-Ply*

Absorption	Durability	Release	Launderability
●●●	●●	●●●	*Not Recommended*

- Heavy-duty, 8 strands per string
- Abrasion-resistant and long-lasting
- Best for cleaning large messes

Rayon Cut-End

Absorption	Durability	Release	Launderability
●●●●	●●	●●●●	*Not Recommended*

- No break-in time, fully absorbent from the start
- Great for smooth floors
- More expensive than other cut-end mops

Kwik-On™ Screw Top Cut-End *4-Ply*

Cotton

Absorption	Durability	Release	Launderability
●●	●	●●	*Not Recommended*

Rayon

Absorption	Durability	Release	Launderability
●●●●	●●	●●●●	*Not Recommended*

- Easy to change mop heads lie flat for more efficient mopping
- Kwik-On wood handle (sold separately) attaches securely to Kwik-On mop head

General Mopping
LOOPED-END MOPS

Built for the Long Haul

Our looped-end mops are built to last, offering reduced fraying, reduced linting and increased launderability. These mops are also great for smooth, hard surface floors and its tailband enables greater floor coverage without gaps or loose strands trailing behind.

Cotton Looped-End *4-Ply*

Absorption	Durability	Release	Launderability
●●●○○	●●○○○	●●●○○	●○○○○

- Available in 1" or 5" color-coded headbands
- Prominent floor coverage
- Ideal for smooth, hard surface floors
- Aggressive cleaning at an economical price point

Synthetic/Cotton Blend Looped-End *4-Ply*

Absorption	Durability	Release	Launderability
●●●●○	●●●○○	●●●○○	●●●○○

- Available in 1" or 5" color-coded headbands
- Expansive floor coverage
- Ideal for hard-surface floors
- High absorbency
- Mops are not pre-shrunk
- Great for high-traffic areas

Solution Insight:

The **OmniFit**™ cleaning system from Sparta® takes a comprehensive approach to floor care, featuring the OmniFit Divided Mop Bucket and ACME thread mop heads and handles for a universal fit.

SPARTA® OmniFit COMPLETE FLOOR CARE SOLUTIONS

OmniFit™ ACME Thread Connection Looped-End

Absorption	Durability	Release	Launderability
●●●●○	●●○○○	●●●○○	●●●●○

- Color-coded synthetic blend mop with special ACME threaded connection at the top of the mop
- Accepts any 3/4" ACME threaded handle, allowing for a universal floor care system

Specialty Mopping
LOOPED-END MOPS

Built for the Long Haul

Where traditional mops fail, specialty mops thrive. Depending on your operations and cleaning needs, a specialty mop may be the solution to clean odd messes on unique flooring.

Synthetic/Cotton Blend Antimicrobial Looped-End *4-Ply*

Absorption	Durability	Release	Launderability
●●●●○	●●●●○	●●●○○	●●●●●

- 1" color-coded headband
- Large floor coverage
- Mops are not pre-shrunk
- Antimicrobial additive to reduce bacteria growth and prevent the spread of germs

Synthetic/Cotton Blend Looped-End *4-Ply with Scrubber*

Absorption	Durability	Release	Launderability
●●●●●	●●●●○	●●●●○	●●●●○

- 5" color-coded headband with an additional scrubber to effectively clean stubborn floor stains
- Large floor coverage
- Mops are not pre-shrunk

Grease Release Looped-End

Absorption	Durability	Release	Launderability
●●●●●	●●●●○	●●●●●	*Not Recommended*

- 5" wide band looped-end mop with special grease release additive
- Great for hard-surface, tile, smooth concrete floors
- Grease releases into the mop bucket, ensuring a clean mop for each pass
- Specialty mop for back-of-house fryers

Rough Surface Looped-End

Absorption	Durability	Release	Launderability
●●●●●	●●●○○	●●●○○	*Not Recommended*

- Heavy-duty mop for rough surfaces
- High coverage with tailband
- Twice the absorbency of cotton yarn mops
- Excellent for abrasive surfaces: stone, quarry, tile and concrete

Specialty Mopping
LOOPED-END MOPS

Rayon Blend Finishing Looped-End *4-Ply*

Absorption	Durability	Release	Launderability

- Available in 1" or 5" headbands
- High floor coverage
- Ideal for hard-surface floors
- Releases liquid faster than conventional mops for a smoother finish

Microfiber Looped-End

Absorption	Durability	Release	Launderability

- 1" color-coded headband
- Good for hard-surface floors
- Great for high-traffic areas

Large Microfiber *with Scrubber*

Absorption	Durability	Release	Launderability

- 5" headband with an additional scrubber to effectively clean stubborn floor stains
- Large floor coverage
- Mops are not pre-shrunk

Solution Insight:

These microfiber mops are washable, great for high traffic areas and are still effective up to 500 washings.
