What is ANSI?

The American National Standards Institute (ANSI) and International Safety Equipment Association (ISEA) – Minimum Requirements for Workplace First Aid Kits and Supplies (ANSI/ISEA Z308.1-2021) establishes minimum performance requirements for first aid kits and their supplies. First Aid kits are classified based on the assortment and quantity of first aid supplies intended to manage most types of injuries and sudden illnesses that may be encountered in the workplace. These may include major and minor wounds; minor burns; sprains and strains; and eye injuries. As each work environment is unique, it is expected that the contents of each kit will be supplemented as needed based upon the recommendations of a person competent in First Aid.
