

## *Antimicrobial Product Protection*

### SHERWIN-WILLIAMS OFFERS MICROBAN® PROTECTION IN SELECT QUALITIES OF LIQUID AND POWDER COATINGS

Sherwin-Williams Chemical Coatings and Microban® antimicrobial product protection have combined to provide an added level of protection in select qualities of liquid and powder coatings. Since the 1930s Sherwin-Williams has been bringing an added dimension of quality, durability and beauty to product finishes for many end uses. Our dedication to innovative coating technology continues with the availability of Microban antimicrobial product protection. Manufacturers of medical diagnostic and workout equipment, gym lockers, laboratory and institutional furniture, door hardware and kitchen cabinets can count on us to provide an added level of antimicrobial protection against stain and odor causing bacteria on the surface of their coatings.

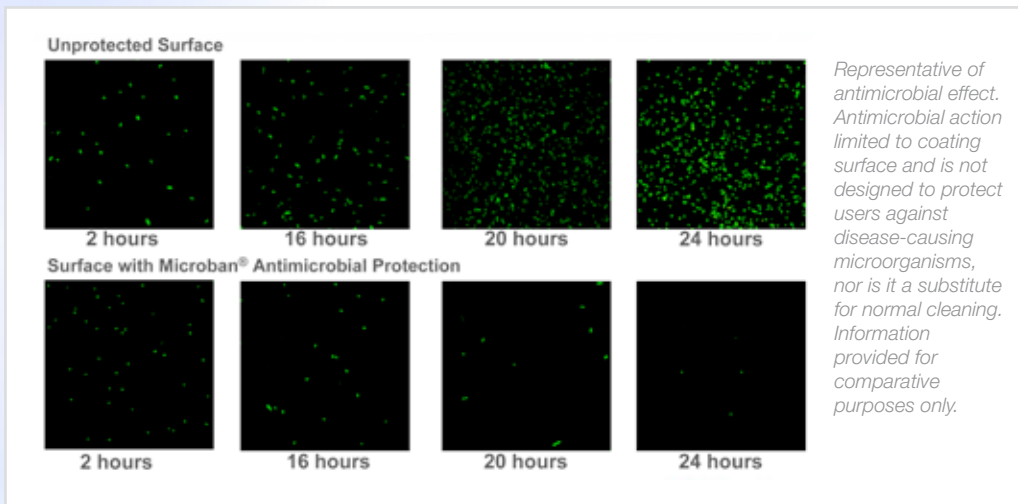

## 24/7 PROTECTION: HOW IT WORKS

Microban<sup>®</sup> antimicrobial protection is infused into Sherwin-Williams product finishes to inhibit the growth of stain and odor causing bacteria that may affect the surface of the coating. Microban technology works 24/7 to protect the coating.

The pictures below, taken using a confocal microscope, demonstrate how Microban protection works to disrupt key bacterial cell functions so that microbes are unable to grow or reproduce. On the unprotected surface, microbes quickly multiply. Unlike surface disinfectants, which temporarily eliminate microbes from the surface of the coating, Microban antimicrobial technology is designed to work 24/7. It protects Sherwin-Williams product finishes from microorganisms such as bacteria that may cause odors, stains or discoloration of the painted surface, or may cause deterioration of the physical properties of the coating.

## LASTING PERFORMANCE BACKED BY AN INDUSTRY LEADER

Utilizing the latest technology in both coatings and Microban antimicrobial provides your products with protection that exceeds other conventional finishes — protection your customers will appreciate. This technology will extend the longevity, integrity and aesthetic beauty of your products.

With the largest distribution network in the industry, expert technical assistance and design engineering services, Sherwin-Williams delivers the world-class service, professionalism and value you've come to expect.
