ONE DECISION • INFINITE SOLUTIONS

V-Grip™ Spill Containment System

Utilizing our V-Grip™ wire shelving and our drip containment system, you can now have shelving fully capable of containing the occasional drip or spill from any fluid you need to store. At the same time, get the benefit from multiple levels to increase your storage capacity — no longer do you have to keep all of your fluid containers and drums on the floor. It is available for four of our most popular shelf sizes.

In the military, the system is known as POL Containment Shelving.

Order the complete V-Grip™ wire shelving unit with the trays, or add the spill containment trays (see part numbers below) to your existing wire V-Grip™ shelving. Available in mirror silver or any of our other colors.

If you have any questions, please contact your local District Sales Manager or call our customer service team at (800) 323-0801.

Pre-configured wire shelving with spill containment trays (all 84" tall shelving units with 4 shelves and trays)

Width	Shelving Depth	Height	Starter	Add-On
36	18	84	43878-01S	43878-01A
36	24	84	43878-07S	43878-07A
48	18	84	43878-08S	43878-08A
48	24	84	43878-09S	43878-09A

Spill tray only

Part No.	Shelf Size	'A'-Length of pan	'B'-Width of pan	Capacity
43878-01	36 x 18	34	16	5 Gallons
43878-07	36 x 24	34	22	6.5 Gallons
43878-08	48 x 18	46	16	6.5 Gallons
43878-09	48 x 24	46	22	9 Gallons

Spill pan is 2 1/4" deep and hooks under a wire shelf.
