Remco
a Vikan company

ACO Modular 200

Remco provides high-quality, color-coded FDA-compliant tools that are ideally suited for food processing and food retail environments. Remco features Vikan's advanced line of brushes, brooms, and squeegees specifically designed to meet the cleaning requirements of drainage systems. These tools are durable, efficient, and cost-effective, making them an excellent solution for challenges commonly encountered during drain cleaning. The total-color and hygienic design of these tools are designed to prevent cross-contamination as part of a color-coding system.

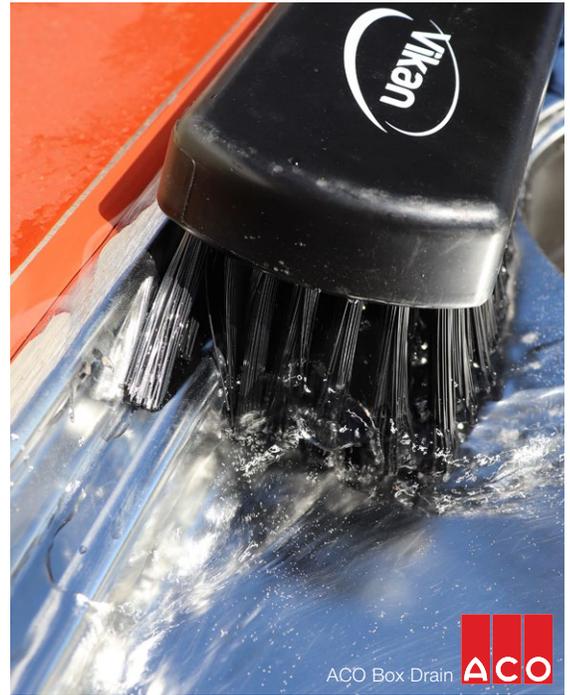

Hygienic Cleaning Tools for Drainage Systems

Available from Remco Products

About 30% of highly contaminated surfaces in a food facility stem from biofilms and bacteria found in drainage systems. Hygienic color-coded cleaning tools, specifically those designed for drain cleaning, can help prevent cross-contamination within a facility.

Drains and gullies present specific challenges to sanitation efforts. Our variety of sanitation tools assist in the detailed cleaning of nooks and crannies commonly found in these areas.

Regardless of the operation's size and complexity, Vikan and Remco offer tools that come in up to 12 distinguishable colors, making them ideal for integration with color-coded plans.
