

# RECYCLED RUBBER

Bulletin Boards and Enclosed Message Centers

Close-Up: Confetti tack surface

On left: Aluminum frame with confetti tack surface Middle: 2-Door enclosed board, aluminum frame with tan tack surface On Right: cherry oak frame with black tack surface

## It's Just Easier.

**Easier on the environment** – the world is quickly becoming a greener place. Is the way you communicate your message as green as it could be? With 90% post-consumer and 10% post-industrial recycled content, you can communicate your message knowing you're taking care of people and the Earth. Bottom line: It's real tires.

**Easier to match your décor** – with our expanded framing options, you can match nearly any décor. For a more natural look, explore oak and cherry oak. Need a sleeker option? Aluminum frames provide contemporary appeal. We offer multiple tack surfaces (black, confetti, and tan).

**Easier to clean** – take advantage of the premium tack surface available today. With a recycled rubber surface, cleaning and maintaining your message center is no problem. The surface is washable and resists staining.

**Easier to rely on** – an advantage of using a recycled rubber tack board is the reliability. The surface is self-healing and resists color fading. Like all Ghent products, recycled rubber bulletin boards come with a 10-year product guarantee from Ghent.

WHO KNEW  
old tires  
could look this  
good!

To match modern environments we've expanded our frame options to oak and cherry oak. Build your own board or message center using the back cover of the brochure.

## Facts are Facts.

**1** *for* **1**  
TIRE HUMAN

Tires are viewed as a one of the most problematic sources of waste. Each year, motorists in the U.S. generate about 1 scrap tire for every man, woman and child in the country.

**Ghent's Recycled Rubber Bulletin Boards** meet the industry standards as a "Green" communication tool. The tack surface is made from real recycled tires. The frame is available in either a satin finish aluminum (which contains 75% post-industrial material) or a solid oak with a natural or cherry finish. The rubber tack surface is self-healing and will hold up under the most demanding conditions.

This diverse bulletin board has many benefits:

- **Resists fading** – perfect for open offices or areas with large amounts of direct sunlight
- **Easy to clean** – perfect for manufacturing facilities, hospitals, or schools with rigid health standards
- **Increased durability** – perfect for high traffic areas because it can withstand whatever wear-and-tear you put it through (and carries a 10-year warranty from Ghent)
