Mounting Marker and Bulletin Boards Using L-Hangers

Model Numbers: B1481011-GLBL, B1481066-GLBL, B1481055-GLBL

NOTE:

For the most secure mounting, install all L-Hangers directly to wall studs. If wall studs are not available, space wall anchors (not included) evenly across the length of the board, starting 4" to 6" from the ends.

1. Determine the desired height from the floor to the bottom of the board. Mark a level line at this point.

2.

For aluminum and wood framed boards: FIG 1

Position half of the hangers provided along the marked line. Space them evenly.

Place each screw in the upper end of the hanger's slot, then firmly fasten each hanger with screws or wall anchors to the wall.

For wooden framed boards with a tray: FIG 2

Position half the hangers provided along the marked line. Space them evenly. Place each screw in the hole of the hanger's short leg.

Firmly fasten each hanger with screws or wall anchors to the wall.

3. Place the board on the bottom L-hangers and mark a line on the wall along the top edge of the board for the top hangers.

4. Remove the board and install and tap the top hangers, spacing them the same as the bottom hangers. Place each screw in the center of each hanger's slot. Fasten each hanger with screws or wall anchors to the wall.

5. Replace the board onto the hangers and tap the top hangers down against the top frame. Using the L-Hangers as a template, mark the hole locations for the top and bottom #8 sheet metal screws.

6. Remove the board, drill 1/8" dia. holes at each of the marked locations and reattach the board with the screws provided.
