THE EXPERTS IN ROOM AIR CONDITIONING

FLEXIBLE, EASY-TO-INSTALL ZONED COMFORT SOLUTIONS FROM THE LEADER IN ROOM AIR CONDITIONING

Whether you're heating and cooling a single room or multiple rooms, you won't find quieter, more energy-efficient solutions than Friedrich ductless split systems. Choose from sleek wall-mounted models, ceiling cassettes that mount flush with the ceiling, and ducted units that install out of sight.

RESIDENTIAL APPLICATIONS

COMMERCIAL APPLICATIONS

WI-FI CONTROL* ANYTIME, ANYWHERE.

*Available on Premier and Pro wall-mounted models, and on Pro ceiling cassette models

ALL OF THE ADVANTAGES OF DUCTLESS SPLIT SYSTEMS AND FRIEDRICH QUALITY

Zero duct loss

According to the DOE, ducted systems lose an average of 25-40% in performance due to leaks, cracks or disconnections in ductwork.

No ductwork means that ductless systems do not experience duct loss, saving energy and money.

No dirty air ducts*

With a ductless system, there's no need to clean dirty air ducts that can harbor dust, germs and allergens that are eventually blown into your home or office.

Zone cooling flexibility

Independently condition up to four separate zones using only a single outdoor unit. Cool or heat only the zones that are in use. Set individual comfort levels for each zone.

Optimized airflow

4-way air swing quickly disperses cool or warm air to all four corners of the room to provide comfort throughout.

The 'Surge Air' feature moves air at an even higher speed for rapid cooling.

Available built-in Wi-Fi

Easily adjust settings and power units off and on with your smartphone. The FriedrichGo™ app is easy to set up and use. Compatible with Amazon Alexa or Google Home.

Wi-Fi available on Premier and Pro wall-mounted models, and on Pro ceiling cassette models.

Friedrich Precision Inverter® delivers exceptional energy efficiency and smooth performance

Precision Inverter technology varies the compressor, the outdoor and the indoor fan speeds, eliminating constant compressor start-ups/shut-downs that traditional systems require to maintain the set temperature.

Each system can adjust capacity and cooling output to provide only the amount of cooling needed at a given time. The result is optimal comfort with low energy costs.

THE ADVANTAGES OF INVERTER DUCTLESS SPLIT SYSTEMS	
TRADITIONAL SYSTEM	INVERTER SYSTEM
At initial start up, a fixed capacity system slowly reaches the set temperature.	At initial start up, utilizes variable capacity to quickly reach the set temperature.
Complete shutdown once set temperature is achieved.	Reduces capacity as set temperature is achieved.
Temperature within the space rises until 2nd system start up.	Variable capacity maintains set temperature keeping space comfortable with reduced energy consumption.
System works at full capacity to again reach set temperature.	
System cycles on and off continually to maintain the set temperature.	

Soft start technology

Friedrich soft start technology starts the compressor with significantly reduced amperage at start up, saving energy versus compressors utilizing locked rotor amperage (LRA).
