

Anti-Foam Additive

Eliminate troublesome foam that can interfere with the operation and performance of cleaning equipment and cleaning procedures. Anti-Foam Additive controls excess foam from detergents, proteins and other sources. Add to return tanks of extraction machines, floor scrubbers, use in CIP solution tanks or spray defoaming applications.

DIRECTIONS:

Read cautions and first aid before use.

Return tanks: Add ½-1 oz. per gallon of return tank capacity.

Industrial & CIP: Add 1 oz. per 50 gallons of mixing tank capacity.

Surface spraying: Add 1 part Anti-Foam Additive to 10-20 parts of water. Spray directly onto foam.

GLOBAL FACTS

- Defoams
- Highly concentrated
- Use in carpet extraction machines
- Ideal for industrial cleaning
