# VERSAMATE-300

If you are looking for a simple and versatile solution for applying labels to flat items such as bags, pouches and envelopes, look no further! The VERSAMATE-300 enables you to label all kinds of flat objects by simply inserting them and watching the machine do the work. The sensors are activated automatically, and the label is applied at over 4.5″ per second. Most items are labeled in less than 3 seconds! The Heavy-Duty construction of the VERSAMATE-300 will withstand the most high volume production environments.
