Simply hose down  
with soap and water

**REMCON  
PLASTICS  
INCORPORATED**  
We listen, develop and deliver!

## This is more than providing you with storage solutions This is a relationship

Remcon Plastics has been creating high-quality, durable, rotomolded containers for more than 30 years. We value our customers and always seek to understand the challenges that their businesses face. Because we deal with industries where performance is key — industries like pharmaceutical, meat and poultry processing, food and beverage, chemical, and manufacturing, to name a few — we understand that our customers rely on us to get it right. And we do.

We've listened to what our customers need...really listened. And along the way, we've adapted to fit those needs.

***Because if our customers aren't happy, we aren't happy. It's as simple as that.***

## We built it to last

Remcon products are made right here in the USA, and we don't cut corners. Our rotomolding process is a science, not a guessing game. We heat and cool the polyethylene for the precise amount of time required for optimal plastic performance. Premium molds make premium parts, and our meticulously engineered molds ensure consistent, high-quality product. All these factors lead to a more durable and better performing product you can depend on for years. That's how we save you money over the long term.

## We're here for you

Every new person we meet is a long-term customer in our eyes. We believe that if we provide quality products and treat our customers with integrity and appreciation, everyone wins. We listen to your concerns, and look for ways to help your business. If you have a unique need, we'll find a way to fill it. If you have an issue, we will address it. We will always make sure that you get the attention and service you deserve.

## We mean it. Here's your guarantee.

We're sure that our Poly Lockers offer you the long-lasting, dependable product you're looking for. So sure that if, for any reason you're not satisfied with the workmanship or quality of the materials we use in making this product, simply contact us during the first year of ownership. You have our guarantee that we'll address the situation to your satisfaction or refund your money.

# How to select the right locker to meet your needs

## Step 1: Select your model and size

We recognize that not every locker is the same, so we've made it easy to select the right locker for you.

**All Remcon lockers are gray in color and come with the following standard features:**

- Made with 100% virgin polyethylene for optimal impact strength
- Polyethylene and pigments used to manufacture the lockers are all FDA compliant
- Seamless, rotationally-molded, double-walled locker doors are dent-resistant and durable
- Reinforced interior hinged door with vents to maximize fresh air flow
- Tight tolerances for smooth installation and trouble-free operation
- Rust-free washable surfaces will not corrode, and contain drain holes for easy sanitation
- Rugged locking device accepts any standard 3/8 inch lock
- Aluminum ID doorplate for engraving
- Stackable design allows you to build two-tier, four-tier, six-tier, or any combination you desire.

Mix and match sizes and styles to build your own configuration

From there, choose the correct Series and size that meets your need or application.

\*Comes standard with one hook

## Step 2: Customize it even more

Here is the fun part. Need shelves? Want hooks, a special color, or some see-through doors? We can do that. Upgrade your lockers to get exactly what you need.

### Here are examples of available upgrades:

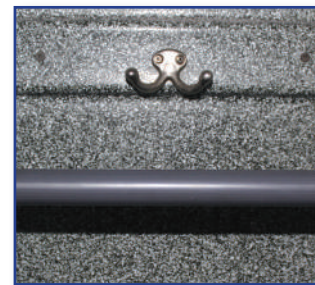

- Add hanger rods (36" and 60" high units only)
- Add the color of choice
- Add see-through door (12" high unit only)
- Add shelving
- Remove drain holes
- Add extra coat hook
- Add wall or island mount kit
- Call us to discuss all of our options

Specify your own color combination

See-through door

Hook and hanger rod

Engraved number doorplate

## Top ten reasons to choose Remcon Poly Lockers

### 1. NO CORROSION

Remcon plastic lockers do not rust. This feature guarantees exceptional durability and years of savings. They are perfect for any harsh and/or humid environment.

### 2. MAINTENANCE-FREE

Because they are made out of tough, molded plastic, Remcon plastic lockers don't require any rust-proofing treatment. The color being molded in means there's no need for painting or refinishing.

### 3. RELIABLE

Featuring a sturdy, double-wall door, Remcon plastic lockers will stand up to the most demanding applications in the toughest environment. Their reliable latching system will withstand abuse and vandalism.

### 4. FDA APPROVED MATERIALS

Remcon plastic lockers are made of FDA-compliant material. They are welcome in any USDA inspected meat or poultry processing plant.

### 5. EASY INSTALLATION

Each Remcon locker is pre-assembled and shipped as a whole unit, which reduces your installation time and cost. Simply mount them on the wall or island.

### 6. BETTER SANITATION

Remcon plastic lockers feature a series of louvers, which provide great ventilation in most applications. Also, because they are molded as whole units, our lockers have a smooth, seamless interior, which reduces dust and dirt collection.

### 7. LIGHTWEIGHT

Remcon lockers are much lighter, yet sturdier than metal lockers. Installation is fast and easy.

### 8. QUIET

Remcon plastic lockers are quieter than metal lockers: the plastic hinges won't squeak, and the doors close in silence.

### 9. FUNCTIONAL

Remcon lockers are available in many sizes. They are a practical and functional solution to space problems in all environments.

### 10. CONTEMPORARY LOOK

Remcon lockers' contemporary appearance will give your facility a new and cleaner look with years of trouble-free performance.
