

## TRACTION FOR ICE & SNOW

SureWerx delivers the most comprehensive range of ice and snow traction aid products in North America, including the original and industry-leading K1 Series® mid-sole ice cleat and the Due North® brand of full-foot and heel-style solutions. No matter the application, work environment, or type of footwear, we have the depth and breadth necessary to help reduce the risk of slips and falls whether you are at work or play

### duenorth®

#### DUE NORTH GRIPPRO™ SPIKELESS

The DueNorth GripPro Spikeless traction aids are designed for workers who frequently transition from outdoor to indoor surfaces or working indoors. The non-spiked design does not damage flooring and will provide extra grip in numerous working environments.

#### DUE NORTH ALL PURPOSE INDUSTRIAL

The Due North All-Purpose Industrial traction aids offer unparalleled grip, maximum durability, and superior operator safety. Best for those who play hard and work harder on ice and snow.

## TRACTION FOR ICE & SNOW

# K1

S E R I E S

### K1 SERIES MID-SOLE ORIGINAL PROFILE

The original and most popular mid-sole ice cleat (K1MID). Featuring a standard rubber platform and durable tungsten carbide studs, the K1MID is most often used with a traditional, defined-heel work boot.

### K1 SERIES MID-SOLE LOW PROFILE

The low-profile model is designed for footwear with a shallow arch in the sole of the foot, often found in hiker-style or tactical boots. The low-profile model has a narrower rubber platform and shorter studs, providing the necessary traction, fit, and comfort.

### K1 SERIES MID-SOLE HIGH PROFILE

The high-profile model is a specialty product designed for safety boots with extra deep treads and an aggressive heel, such as lineman's or logger boots used in forestry, power and utilities, oil and gas, the pipeline industry, and other deep-freeze environments.

### K1 SERIES SLIM PROFILE

The K1 Slim is a one-size-fits-all traction solution designed for flat-soled footwear. The rotatable design combines a non-spiked anti-slip material with traditional ice-penetrating tungsten carbide studs to maximize safety and productivity when working indoors or outdoors.
