# Cordless Wet/Dry Vacuum Model(s): 641809

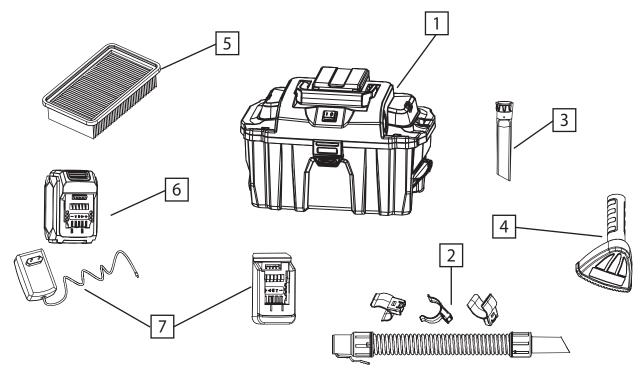

## Specifications:

|              |          | Charger      |         |        |          |        | Weight  |
|--------------|----------|--------------|---------|--------|----------|--------|---------|
| Voltage (DC) | Capacity | Voltage (AC) | Current | Time   | Volume   | Rating | weigiit |
| 20V          | 4.0Ah    | 120V         | -       | 60 min | 2.6 G al | IP24   | 7 lb    |

## **SAFETY INSTRUCTIONS**

- 1. Do not vacuum flammable liquids, gases, or other hazards.
- 2. Do not step on, kink, or cut the vacuum hoses. If the hoses are damaged or otherwise impared, cease operation of the vacuum.
- 3. Regularly change filter and dust bag to prevent blockage or vacuum choking.
- 4. Cease operation of the vacuum in the event of a blockage. Running the vacuum for an extended duration when the hose is blocked may cause permanent damage.
- 5. Do not stick hands or any other body parts in the vacuum hose.
- 6. Do not operate the vacuum with an overfilled dust bag/tank.
- 7. Do not allow children to operate the vacuum.
- 8. Vacuum can be used to clean spills and fluids, but cannot be exposed to rain or wet conditions. Water entering a power tool will increase the risk of electric shock.
- 9. Grounded chargers must be plugged into an outlet properly installed and grounded in accordance with all local codes and ordinances. Never remove the grounding prong or modify the plug in any way. Do not use adapter plugs. Check with a qualified electrician if you are unsure if the outlet is properly grounded. If the tools should electrically malfunction, grounding provides a low resistance path to carry electricity away from the user.
- 10. Disconnect battery before making any adjusments, maintenance, or storing the machine.
- 11. Do not use vacuum if power switch does not work. Cease operation and repair switch or replace vacuum.
- 12. Do not use vacuum if battery is damaged. Cease operation and repair or replace battery.
- 13. Do not use third party or aftermarket accessories, they may impare operation of the sander or malfunction during normal use.
- 14. Maintain all labels and nameplates on the machine so that they are clearly visible and legible.

## **PACKING LIST**

| CONTENTS |      |                    |  |  |  |
|----------|------|--------------------|--|--|--|
| Ref.     | Qty. | Description        |  |  |  |
| 1        | 1    | Vacuum Cleaner     |  |  |  |
| 2        | 1    | Hose & Hose Clips  |  |  |  |
| 3        | 1    | Dry Nozzle         |  |  |  |
| 4        | 1    | Wet Nozzle         |  |  |  |
| 5        | 1    | HEPA Filter        |  |  |  |
| 6        | 1    | Battery            |  |  |  |
| 7        | 1    | Battery Charger    |  |  |  |
| 8        | 1    | Manual (not shown) |  |  |  |

## **ASSEMBLY INSTRUCTIONS**

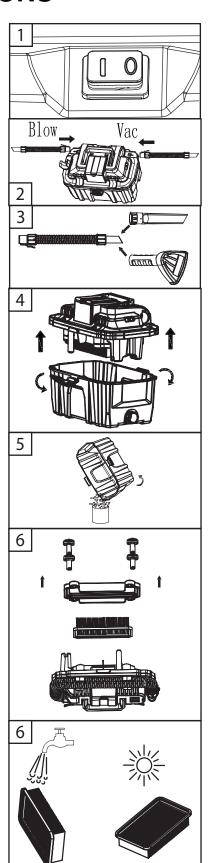

- 1. Vacuum hose assembly components are stored in vacuum tank. Undo tank side clips to open vacuum cover and remove components.
- 2. Wet and dry nozzles are located in the sides of the vacuum tank
- 3. Place cover back on vacuum tank and insert hose clips.
- 4. Insert battery into battery compartment located in the vacuum cover.
- 5. See Operation Instructions for hose installation and removal.

## **OPERATION INSTRUCTIONS**

- 1. To turn vacuum on or off, use the on/off switch located at the front of the vacuum cover. When turning vacuum on, make sure it is properly plugged in first while it is still off. Turn switch off before unplugging after finishing vacuuming, or when changing accesories.
- 2. To connect hose to vacuum, insert end of hose into inlet and rotate clockwise until locked. To remove, rotate counterclockwise and then pull.
- 3. To use the blower, turn the on/off switch off. Insert end of hose into air outlet, located in the left of the vacuum cover, then turn clockwise to tighten. Turn the switch on. WEAR EYE PROTECTION AND A DUST MASK WHEN USING THE BLOWER.
- 4. To connect wet/dry nozzle to hose, insert end of hose into brush outlet and rotate clockwise until tight. To remove, rotate counterclockwise and then pull.
- 5. Clean the vacuum tank after every use. To access the vacuum tank, remove the vacuum cover by opening the two side clamps and pulling the cover up and out of the tank. If contents of the tank are wet, clean and dry the tank after discarding contents.
- 6. Clean the HEPA filter after every use. To access the filter, remove the vacuum cover. Turn the filter locking knobs counterclockwise and remove the filter. Clean the filter under cold, running water. Do not use detergents or soaps to clean the filter.

#### **A WARNING**

DO NOT use vacuum to suck or blow burning or flammable material or otherwise hazardous chemicals

#### CHARGING INSTRUCTIONS

- 1. Slide battery pack onto charger upside down until it clicks in place.
- 2. Plug the charger into a wall outlet. The RED charge indiciator LED should illuminate. Battery should reach full charge in approximately 60 minutes.
- 3. GREEN charge indicator LED should illuminate when battery is fully charged. Unplug the charger.
- 4. Press the release button on the battery and slide the battery out of the charger.

NOTE: the battery may have become hot during charging, allow the battery to return to room temperature before use.

NOTE: the battery ships partially charged to avoid deep discharge damage, however you still must fully charge the battery before your first use.

#### **MAINTENANCE**

- 1. Avoid using the vacuum for more than 20 minutes at a time.
- 2. Clean the filter and tank after every use. Do not run the vacuum with a dirty filter or full tank.
- 3. Dump any dirty water after vacuuming to prevent corrosion.
- 4. Dry all wet surfaces with a paper towel or dry cloth.
- 5. DO NOT vacuum for more than 20 minutes at a time, the battery will overheat.
- 6. Allow the battery to come down to room temperature before recharging

#### TROUBLE SHOOTING

| PROBLEM                      | POSSIBLE CAUSE                                       | CORRECTIVE ACTION                |  |
|------------------------------|--|----------------------------------|--|
|                              | Battery charge is low                                | Charge battery                   |  |
| Motor won't start            | Battery is not properly inserted                     | Remove and reinstall battery     |  |
| Word won t start             | Battery is not properly inserted                     | correctly                        |  |
|                              | On/off switch is broken                              | Replace on/off switch            |  |
|                              | Tank is full   | Empty and clean tank             |  |
| Reduced suction              | HEPA filter is clogged                               | Clean/replace the filter         |  |
| Neduced Suction              | Blockage in nozzle or hose Remove and clean nozzle/h |                                  |  |
|                              | Battery charge is low                                | Charge battery                   |  |
| Motor stops when vacuuming   | Battery charge is low                                | Charge battery                   |  |
|                              | Poor contact between battery and                     | Remove and reinstall battery     |  |
| Battery pack fails to charge | charger correctly                                    |                                  |  |
| battery pack rails to charge | Pattonuis too hot                                    | Wait for battery to cool to room |  |
