

Forklift & Hoist Bulk Bag Lifter

Model 989046

Capacity:	4,000 lb.	Overall width:	40 inches
Net weight:	91.0 lb.	Usable width:	35-3/4 inches
Safety strap:	46 inches	Overall length:	40 inches
Fork bracket width:		Usable length:	35-3/4 inches
Fork bracket Height:	3-1/4 inches	Overall height:	10-1/2 inches

The fork lift and/or the hook can be used to carry this bag lifter.

Before use, please confirm:

The forklift and/or hoist have higher load capacity than 4000lb. Plus lifter weight.

The hook has safety latch.

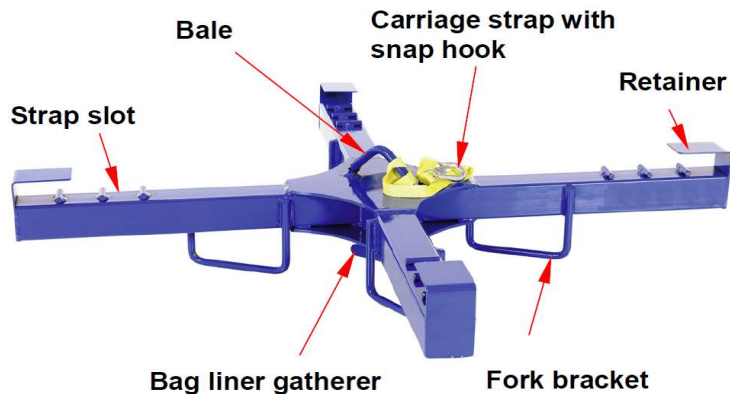

The weight of the bulk bag and the load inside is no more than 4000lb.

The lifter has no visible deformation, crack, rust, especially around the welding of bale.

The carriage strap has no visible torn, worn area, hooks work well.

All labels/tags have no damage and are easily readable.

Read all labels/tags carefully.

Mounting the lifter on forks or hook.

1. Attach the hook to the bale, latched. Or
2. Insert two forks of forklift through all 4 fork brackets.
3. Adjust the location of the lifter on the forks to accommodate a bulk bag.
- * The gravity center of the lifter must be within the forklifter's gravity center range.
4. Attach the carriage strap to the fork carriage without slack. Do same if the hook is attached on the forklift.
5. Elevate the forks/hook.
6. Attach each strap (4) of the bulk bag to one of the arm of the lifter, slide the straps over the retainer and seat them into strap slots.
- * The bag liner gatherer is used to hold the top of the plastic bag liner.
