

## Forklift Fork Leveler

Model: 989048

### Assembly:

**Note:** The indicator should be assembled at the left side of mast and points to the driver

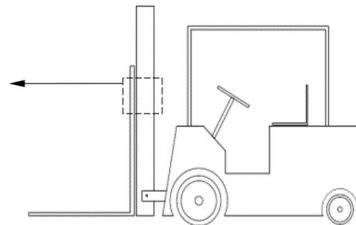

**Step 1:** Park the fork truck on the level ground, and put the fork at the horizontal position

**Step 2:** Mark the location where the indicator is at the same level to the driver's sight line

**Step 3:** Tear off the hook strips of the indicator, peel the paper cover and stick it at the marked location horizontally  
Make sure that the mask surface is clean, and adhesive is stuck well

**Step 4:** Put the indicator on the hook strips as shown, the swivel red needle must be aligned with the fixed yellow needle

### Indication:

Red needle below the yellow one means forks tilting down

Red and Yellow needle overlapping means forks are horizontal

Red needle over the yellow one means forks tilting up
