

Global Industrial™ Emergency Eyewash Stations

The Global Industrial™ Eye Wash Stations are essential for industrial spaces where accidents can occur with chemicals or hazardous substances. These units provide immediate, reliable and effective treatment as needed. Both units feature 11-1/2” diameter washbowls constructed from durable ABS plastic with attached dust covers to prevent unwanted contaminants from entering eyewash heads when not in use. Choose from **wall** or **pedestal mounted** options for perfect integration into your facility. Includes ANSI compliant emergency eyewash sign. Stations comply and meet **ANSI Standard Z358.1-2014**.
