

Global Industrial™ Emergency Drench Shower

The Global Industrial™ Emergency Drench Shower is horizontally mountable to the floor of a nearby working location to provide quick access to overhead flushing of corrosive elements and affected areas.

Emergency drench shower is pull-rod activated for immediate water flow. Schedule 40 galvanized steel ensures lasting durability and protection in conditions where corrosive elements are present. Shower head is constructed from ultra-durable and scratch resistant ABS plastic. Bright yellow color finish distinguishes clear visibility. Includes ANSI Compliant identification sign. ETL Listed 101496/ANSI Z358.1-2014.
