

# MODULAR SPILL PLATFORMS

## PLATFORMS CREATE CUSTOM SPILL CONTROL STATIONS

- The interconnecting design can be arranged in an infinite number of configurations in order to meet your specific requirements using the integral sidewall channel connectors.
- Stations feature up to a 60 gallon liquid capacity with up to a 10,000 lb. load capacity ensuring high volume spill containment.
- The bright yellow high-density polyethylene (HDPE) construction is both impact and corrosion resistant for multi-chemical support.
- Removable poly grate supports allow for convenient sump access and easy station maintenance.
- Optional Ramps may be utilized allowing convenient drum hand truck accessibility for ergonomic loading and unloading in and out of tight locations.

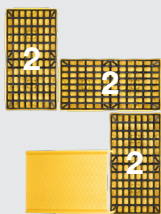

The nesting design maximizes your vertical storage while reducing the overall station footprint.

MODEL	CAPACITY GALLON	CAPACITY LBS.
988951	15	2,000
988952	30	5,000
988953	60	10,000

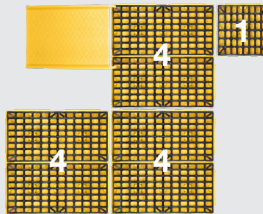

## SAMPLE CONFIGURATIONS

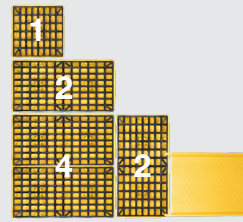

(3) One Drum

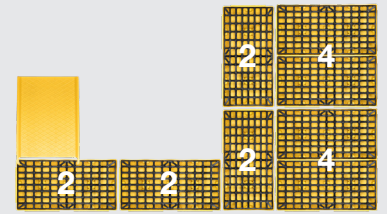

(3) Two Drum and (1) Ramp

(1) One Drum, (3) Four Drum and (1) Ramp

(1) One Drum, (2) Two Drum, (1) Four Drum and (1) Ramp

(4) Two Drum, (2) Four Drum and (1) Ramp
