PVC SHRINK FILM

FILM & BAGS

Best value for general purpose shrink applications

- **Crystal clear packaging in seconds**
- **Keeps product from moisture, dust, oil and pilfering**
- **Shrinks uniformly in all directions when controlled heat is applied**
- **Skin tight wrapping without wrinkling**
- **Runs on a variety of equipment**

PVC Centerfold shrink film is smooth, highly reflective and provides high clarity. PVC film is very versatile and will perform well on low, medium, or high-speed applications. PVC film is often used by suppliers of art and frame products, CDs, DVDs, and VHS tapes. Our PVC shrink film requires very low temperature to shrink (works great with heat guns). This shrink film is ideal for operators who work with sealers and shrink tunnels. PVC film has the ability to resist ambient heat in transit and storage.   Our PVC film shrinks with an MD of 35-35% and TD of 45-50%. MD (machine direction) is vertical or length shrinkage. TD (transverse direction) is horizontal or width shrinkage. We recommend 75 gauge for packaging light products under 12lbs. And 100 gauge for products over 12lbs, but under 30lbs.

Size	75G / 500ft	75G / 2,000ft	100G / 1,500ft
8"		F-8-75-2000
