

Chill-Its®

DRY EVAPORATIVE TECHNOLOGY

6685 // 6686 >>>

Patented dry evaporative cooling provides an innovative and effective alternative to those looking for:

- // A 100% dry cooling experience
- // A lightweight product
- // Extended cooling duration (up to three days)
- // A low-maintenance and easy-to-use product

The principles of dry evaporation are similar to wet evaporation in that the cooling process is activated by water and airflow. Body heat and the surrounding air will cause the water within the vest to evaporate – cooling the wearer down.

HOW TO ACTIVATE YOUR DRY EVAPORATIVE COOLING TECHNOLOGY (MODELS 6685 // 6686)

1 FILL

2 DISTRIBUTE

3 COOL

6685 DRY EVAPORATIVE COOLING VEST

- Provides immediate and long-lasting cooling
- Up to three days of cooling ability
- Fill vest with 13-20oz (400-600ml) of water to activate
- Lightweight, durable and machine-washable
- V-neck with zip closure
- Mesh side panels provide additional ventilation and stretch
- Patented
- Available sizes: M-4XL
- Colors: Lime
- Available NOW!

6686 DRY EVAPORATIVE COOLING CAP

- Fill cap with 3oz (88ml) of water to activate
- Water tight valve is easy to open and fill
- Cap provides up to three days of dry cooling relief
- Once water has evaporated, just refill to reactivate
- Air holes in cap provide ventilation
- Adjustable sizing
- Machine-washable
- Patented
- Colors: Gray
- Available NOW!
