

SURFACE MOUNT WATER BOTTLE FILLING STATION

WITH PFAS FILTER, BY GLOBAL INDUSTRIAL™

High Performance Filtration. Low Profile Design.

Featuring a heavy-duty galvanized steel construction, a drainage system that eliminates standing water, and a laminar water flow that minimizes splashing, this indoor bottle filler is an ideal solution for warehouses, airports, hotels, schools, offices, and more. It has an LED display counter that tracks the number of bottles saved from landfills and a filter monitor that lets you know when it's time to change the filter.

The Surface Mount Water Bottle Filling Station ships with our new Global Pure™ high-capacity PFAS filter that improves drinking water quality through the reduction of total PFAS (PFOA+PFOS, PFNA, PFHxS and PFHpA), with NSF/ANSI 42, 53, 372, and 401 compliance. Its 3,600-gallon capacity reduces filter replacement frequency to just once or twice per year, depending on usage, to deliver the lowest total cost per gallon versus comparable competitor models.

FEATURES INCLUDE:

-  **ADVANCED FILTRATION SYSTEM**
Utilizes a high-capacity, 3,600-gallon filter that removes total PFAS and the full range of chlorine, lead, cyst, turbidity, & microplastics
-  **FAST FILLING**
Water dispenses at a high flowrate of 1.0-gallon per minute
-  **BUILT FOR HEAVY USE**
Strong, corrosion-resistant galvanized steel frame with an impact-resistant ABS housing & stainless steel trim frame with a long service life
-  **EASY ACCESSIBILITY**
ADA-compliant with "Hold Bottle in Front of Sensor (6 inches to the right)" in Braille on the front panel

WEIGHT & DIMENSIONS

Width	17-7/8"
Depth	6-5/16"
Height	25-9/16"
Weight	15.9 lbs.

PRODUCT DETAILS

Number of Stations	1
Wattage	18 W
Hands Free Operation	Yes
Material	ABS
Filter	Yes
Installation Type	Wall
Refrigerated	No
Bottle Filling Activation	Sensor
Automatic Filter Status	Yes
Hertz	60 Hz
Amperage	0.15 A
For Outdoor Use	No
Style	Surface Mount
Voltage	115 V
Includes	Bottle Filler (761251 & Filter 761215PF)
Vandal-Resistant	No

HIGHLIGHTS

- ✓ Touchless activation with automatic shut-off
- ✓ Filter requires just a 1/4-turn to remove and re-install, for easy filter changes
- ✓ Secure keyed access panel protects against vandalism & tampering

Drain system eliminates standing water

Rust- and dent-resistant lower cover

Braille font messaging

LED bars flash to alert when a filter change is needed.
