

If it's cylindrical, we can grip it.

Jaw, beak, strap, and cradle geometry engineered to your exact container — beyond the 18–28 in. drum standard.

► Kegs · pails · reels · tanks · everything between

ONE BUILDER, EVERY STYLE: Forklift Attachments · Lifts & Rotators · Lifts & Transporters · Drum Dumpers · Hand Trucks · Dollies · Skid Steer

RECENTLY ENGINEERED Real modifications, built and shipped

Extended-Reach Lift & Rotator

A standard rotator rebuilt with extended reach for deeper workstations and oversized spill containment.

Custom-Diameter Grips

Jaw geometry resized beyond the 18–28 in. standard — for kegs, pails, and other cylindrical containers.

Extended-Chute Drum Dumper

A drum dumper built with a longer chute to clear taller receiving containers on the line.

Diameters & Grips

Jaws, beaks, straps & cradles sized to your container's exact diameter, height & chime.

► Kegs · pails · reels · tanks

Reach, Height & Capacity

Extended reach, taller masts, custom lift & dump heights, frames rated above standard.

► Extended reach · higher capacity

Footprint & Terrain

Narrower builds for tight doors & aisles, custom leg spreads, rough-terrain wheel packages.

► Narrow builds · rough terrain

Power & Controls

Alternate voltages, battery conversions, indexed rotation & integrated weigh scales.

► 230/460V · battery · scales

Colors & Finishes

Custom powder coat colors to match 5S zone standards and plant safety schemes.

► 5S color coding · custom finishes

Process Interfaces

Extended chutes for drum dumpers, spouts & funnels matched to mixers & hoppers.

► Extended chutes · hopper interfaces

From idea to iron — how custom works

- 1 Quote**
Share the application; we scope and quote it.
- **2 Purchase Order**
Your PO kicks off the engineering work.
- **3 Drawing & Sign-Off**
Engineering drafts your unit; you sign off on it.
- **4 Build**
Production begins on your signed drawing.
- **5 Shipped**
Arrives fully assembled, ready to use.

Custom projects are quoted individually; scope, minimums, and engineering feasibility apply.

Bring us your unique application.

Contact your Global Industrial rep — we'll take it from a sketch to a signed drawing to your floor.
